Moments later.....

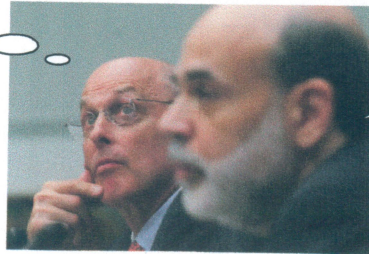

Ben! You gotta kidding me! That's it??? All we got is 8,000 tonnes?

So that's about \$100 billion worth of gold in the vaults and it's supporting our \$10 trillion worth of our debt and the entire world financial system???

We're f*cked!!!! Why did we ever let Lehman tank??

There is good news sir...Stickman's estimate does not include American's gold fillings and the inventory at Zales!!!!
